Response to Amendment

The following is in response to the amendment filed on December 1, 2003.

Allowable Subject Matter

Claims 12-26 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art does not disclose or suggest closing a shoe of a shoe press against a backing roll, such shoe being positioned within a press belt, whereby the position of the shoe is measured in at least two positions across the width of the shoe (cross-machine direction), and the closing of the press shoe is controlled based on these measurements.

Applicant has incorporated structural features of the shoe press into independent claims 12 and 18 which clearly distinguish the present invention from other types of pressing arrangements such as a two-roll press. These features were already present in independent claim 23.

Reference is made to the Interview Summary of September 23, 2003 (mailed on October 1, 2003) wherein the allowable subject matter was discussed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
